

Before and After School Care

Martin Luther offers a before and after school program to students from four year-old Kindergarten through 12 years of age. Our school age program aligns with Stoughton public school calendar to provide a fun-filled, educational program on non-school days.

Summer Program

Our child care center offers a fun and exciting summer program that will keep your child engaged in a variety of activities and field trips throughout the summer. This program offers flexible scheduling options to accommodate all schedules.

Child Care

**Learn,
Grow,
and
Discover
Together!**

Infants:

6 weeks-12 months

Our teaching staff will provide a loving, safe, and nurturing environment that is flexible to your infant's needs. Personal attention and interaction between our teachers and your infant will promote cognitive and social skills.

One Year-Olds

Our program offers toddlers a variety of stimulating activities and classroom equipment that supports safe exploration. Our experienced teachers reinforce important developmental objectives through fun experiences.

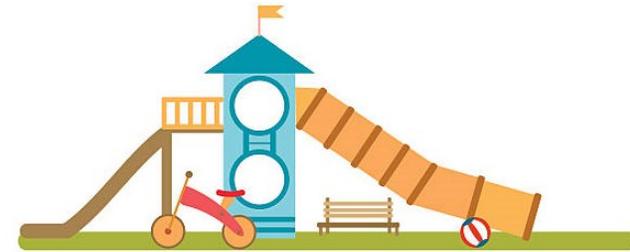

Two Year-Olds

Martin Luther emphasizes development fundamentals by providing an educational and social environment. Your child will build a sense of community as they interact, take turns, learn to share, and cooperate with others. Our caring teachers will keep small hands busy and young minds engaged through activities designed specifically for this age group.

Three Year-Olds

Our curriculum is organized into theme-based units that inspire children to develop and expand their skills. Our teachers will provide a stimulating classroom environment for your child to learn and grow.

Four and Five Year-Olds

Our program offers a nurturing atmosphere that promotes independence and prepares your child for the next phase of their early education. Mathematics, creative arts, music, scientific discovery, language and literacy provide the adventures of a lifetime of learning. Our teachers work well with children within a group to demonstrate listening and cooperation.
