

Infants 6 weeks to age 1

Your baby's first year of life is an exciting time of growth and development. Infants are unique and have their own patterns for play, feeding and sleeping. Our teaching staff will provide a loving, safe and nurturing environment that is flexible to your child's needs. The experiences that infants have during the early months of their life are crucial to healthy brain development. Personal attention and interaction between our teachers and your infants will promote basic cognitive and social skills. Talking, reading and singing are some of the behaviors that support development during this critical stage.

One-Year-Olds

Toddlers learn through sensory experiences that enhance their cognitive, motor, social and language skills. Our teaching staff recognizes that children may be at different stages of development. While some children may have

just started walking, others are already exploring their surrounding environment. We have designed our classrooms and equipment to support safe exploration. Our program offers children a variety of stimulating activities, such as matching and sorting, exploring colors, music, reading and counting. Our experienced teachers reinforce important developmental objectives through these fun experiences.

Two-Year-Olds

Children at this age are curious about the world around them. They begin to exert their independence, as well as learning to communicate their thoughts. Martin Luther Christian Child Development Center emphasizes the development of the whole child by focusing on education fundamentals as well as social skills. Your children will build a sense of community as they interact, take turns, learn to share, and cooperate with others. Our caring teachers will keep small hands busy and young minds engaged through activities designed specifically for this age group.

Three-Year-Olds

Our three year old program provides an environment where children are challenged to learn and are encouraged to explore. Our curriculum is organized into theme-based units that inspire children to develop and expand their skills and build self-confidence. Each of our units include dramatic play, math, art, sensory, music and movement, language, science, and motor skill development. Our teachers will provide a stimulating classroom environment for your child to learn and grow.

Four and Five-Year-Olds

Our four and five year old program offers an organized and nurturing atmosphere that promotes independence and prepares your child for the next phase of his or her early education. Mathematics, creative arts, music, scientific discovery, language and literacy provides the adventure of a lifetime of learning. Our teachers work well with the children within a group to demonstrate listening, sharing and cooperation. Childcare is also available to all children that participate in the Stoughton Area School Districts 4K program and are in need of childcare.

Before and After School Childcare

Martin Luther offers a before and after school program to students from 4-year kindergarten through 12 years of age. The children get to spend time with their friends, enjoy crafts and activities, and are provided time to work on their homework. Our school age program also aligns with the public school calendar to provide a fun-filled, educational program on non school days.

Summer Program

Our childcare center offers a fun and exciting summer program that will keep your child engaged with fun activities, crafts, games and reading. Throughout the summer we take a variety of field trips. This program offers flexible scheduling options to accommodate your busy summer schedule.

A fun, safe and flexible environment that provides excellent opportunities for children to learn, grow and discover.

Martin Luther
